

MCQS on Requirement Engineering tasks

1. In which requirement engineering task project scope is identified
 - a) Elicitation
 - b) Inception
 - c) Elaboration
 - d) Specification
2. Requirements change from time to time is called
 - a) Problem of Understanding
 - b) Problem of scope
 - c) Problem of volatility
 - d) None of the above
3. Requirement model is developed in which of the following requirement engineering task
 - a) Validation
 - b) Inception
 - c) Elaboration
 - d) Specification
4. Which of the following requirement engineering task reconcile conflicts in requirements
 - a) Negotiation
 - b) Validation
 - c) Elaboration
 - d) Specification
5. Specification can be a
 - a) Written Document
 - b) Form
 - c) Table
 - d) None of the above
6. The quality of requirement specification is assessed through
 - a) Elaboration
 - b) Management
 - c) Validation
 - d) Negotiation
7. Conflicting requirements are common in Requirement Engineering, with each client proposing his or her version is the right one.
 - a) True
 - b) False
8. The primary requirements validation mechanism is
 - a) Inspection
 - b) Walkthrough
 - c) Technical review
 - d) None of the above

9. Which requirement engineering task take care of changing nature of the requirements

- a) Validation
- b) Management
- c) Elaboration
- d) Negotiation

10. Which one of the following is not a task of requirement engineering?

- a) Elicitation
- b) Design
- c) Elaboration
- d) Specification
